

MEANTIME LONDON

INDIA PALE ALE

THE ORIGINAL BITTER BEER

7.5% ABV

A Glass Full of Hops

Maris Otter malt, Fuggle and Golding hops

Our India Pale Ale may best be described as hop wine. A light copper coloured beer it is stuffed full of Fuggle and Goldings hops by the bucketful, which throw out ginger notes and flavours of Seville orange marmalade.

A beer that will only get better and better with time it is one that can be laid down in the wine cellar where it will more than hold its own. Usually associated with Burton-on-Trent, IPA was actually invented in Bow, East London at the end of the 18thC.

FOOD PAIRINGS

This was the original 'export' ale and as the beer that the British drank when they invented curry, this, not lager – is the original, authentic and ideal partner to all great British dishes be they ploughman's, roast beef, or curry.
